

US 6,020,974A

United States Patent [19]

Kotsuki et al.

[11] Patent Number: 6,020,974

[45] Date of Patent: Feb. 1, 2000

[54] **COMMUNICATING APPARATUS**[75] Inventors: Kunio Kotsuki; Tokio Imahayashi;
Masahiro Ezato, all of Fukuoka, Japan[73] Assignee: Matsushita Electric Industrial Co.,
Ltd., Japan

[21] Appl. No.: 09/089,162

[22] Filed: Jun. 2, 1998

[30] **Foreign Application Priority Data**

Attorney, Agent, or Firm—Venable; Robert J. Frank; Robert
Kinberg[57] **ABSTRACT**

In a communicating apparatus, telephone or directory application software can be automatically initiated in a personal computer. An off-hook detecting unit of the apparatus continuously makes a check to determine whether or not an external telephone is set to an off-hook state. If this is the case, the off-hook detecting unit sends off-hook information via a serial interface to the computer. An application initiation request unit of the computer monitors the serial interface. Having recognized an off-hook state of telephone in accordance with the off-hook information, the request unit automatically initiates the directory application software.
